Dear Commissioners Gary Pierce, Brenda Burns, Bob Stump, Susan Bitter Smith and Bob Burns:

In 2008, a Smart Meter was installed on our home but we were never notified of its installation. That was the year my hair began to fall out. I know this because I began talking with an herbalist trying to find solutions for the sudden hair loss. I also began experiencing headaches. And in the middle of the night about 3 a.m., I experienced vertigo which I'd never experienced before. I thought I was having a stroke.

As time went on, I began having "floaters" in both eyes. It wasn't until 5 years later, 2013, when we discovered there was a Smart Meter on our home. After researching the ramifications of a meter pulsing radiation up to 190K per day, I realized my symptoms were due to this unsafe technology. We immediately notified APS to remove the meter and replace it with a safe Mechanical Analog Meter which they did.

We also discovered that the radiation from the Smart Meter amplified dirty electricity 10 fold which created

voltage spikes in electrical wiring and is known to damage household equipment.

Even with the Smart Meter having been removed from our home, we continue to be awakened at 3 or 4 a.m. due to APS's data dump from the surrounding Smart Meters which is then transmitted to APS. This technology is not only harmful to human beings, but our pets as well. Many people have reported that birds no longer are seen in their yards after a Smart Meter was installed on their homes. Reports of fires and explosions started by Smart Meters are on record below.

Thank you for your time, and I hope you will come to the conclusion that this hazardous technology should never be forced in the lives of people against their will. After all, weren't the men and women who have fought, lost their limbs and even died in wars told that their selfless sacrifices were for our liberties? If we have no say in a situation such as this, we have no liberty, and it makes the sacrifice of these fine men and women in vain.

Respectfully,

Judy Staab
